SUMMARY

A Full stack developer specialized in developing full-stack solutions using React.js, Node.js, and JavaScript, along with practical experience in MySQL, and server-side deployment. Throughout my professional journey, I have worked on real-world projects including e-commerce platforms, admin dashboards, API integration, authentication systems, role-based access control, and production deployments. I focus on writing clean, maintainable code and creating responsive applications that deliver excellent user experience and performance.

EXPERIENCE

Front End Developer | Tricity Services | Dec 2025 – Present

- Developed React applications with JavaScript and TypeScript for over 15 agency clients.
- Improved dashboard load times by implementing lazy loading, code splitting, and caching, reducing it from 5.6 seconds to 1.4 seconds.
- Managed Redux state across more than 12 screens, ensuring synchronization between API data and UI state.
- Integrated over 30 REST endpoints using Axios, effectively handling loading, error, and response states.
- Collaborated with backend developers to define API contracts, linking frontend workflows to services backed by PostgreSQL and MySQL.
- Converted more than 20 Figma designs into responsive, cross-browser compatible layouts for mobile, tablet, and desktop devices.

PROJECTS

HisaabBook | Full Stack CRM | React · TypeScript · NestJS · GraphQL · PostgreSQL

hisaabBook.app | github.com/aryan7061/HisaabBook-ui | github.com/aryan7061/HisaabBook-api

- Shipped a CRM for companies, contacts, deals and tasks using React, TypeScript, Refine, Ant Design, NestJS, GraphQL and PostgreSQL.
- Modeled 7 relational PostgreSQL entities with TypeORM and versioned migrations, exposed GraphQL CRUD with pagination, filtering, sorting and aggregates.
- Applied DataLoader to batch database lookups, preventing N+1 queries in GraphQL resolvers.
- Implemented JWT authentication, bcrypt password hashing and server-side authorization across 4 roles, with user-level record access controls.
- Created 17 routed pages, including a drag-and-drop Kanban board, analytics dashboards, Excel export and INR/USD conversion.

Prime Tube | Video Sharing Platform | React · React Router · Material UI · Axios

- Built a React video platform for searching and watching YouTube videos.
- Configured React Router for 3 dynamic views covering video details, channels and search.
- Connected YouTube data from RapidAPI through Axios, with loading and error handling.
- Styled a dark-themed interface using Material UI and custom CSS across 10+ reusable components.

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Ant Design, Refine

Backend & Databases: Node.js, NestJS, TypeORM, PostgreSQL, MySQL, MongoDB

State & APIs: Redux, Redux Toolkit, REST APIs, GraphQL, Axios

Programming: Python, Object-Oriented Programming

Tools & Deployment: Git, GitHub, Vite, Figma, Chrome DevTools, Vercel, Render, Kaggle

EDUCATION

Master of Computer Applications (MCA) | Chandigarh University | 2023 – 2025

Bachelor of Computer Applications (BCA) | Chandigarh University | 2020 – 2023
